That there is no issue before he country at this time demanding the main necessity must be sectional; that there are no Territories where the question of slawe labor or free labor is not already effectually settled therefore, all efforts by the leaders of parties to excite the people of different sections against each other on this issue are misdirected and mischievous in their tendency.

This is a resolution passed by the Constitu

nal-Unionists of Massachusetts. The edito of the Journal has the assurance to republish t and applaud it. What was his employmen ast year daily? Didn't he strive to excite the BY VIRTUE OF A DECREE OF THE LOUISVILLE eople on this slavery question? During the entire canvass for Governor he did little else And now what is his objection to a distinguished emocrat for President? It is just this: The said candidate holds that Congress shall no interfere with slavery in the Territories; that whatever agitation there may be shall be local ized; that the people of the Territories shall attend to it as their own business, and legislat upon it at their discretion, subject only to the straints which the Supreme Court of the United States may impose. Does not the comnon sense of every man see that this is the only plan to put an end to agitation? If Congress must act on this subject, agitation is a essity which no human power can control He that invokes the action of Congress on this ALSO—at the same time and place, will be sold all the ersonal Property belonging to the late firm of Roat, ong, not disposed of before the day of sale, consisting a onl, iron, Tools, Patterns, &c.; Hand Lathes, on Cast-Iron hears; Single and Bouble-Read Lathes, 25 to 33 inche subject, invokes agitation, provides for it, and produces it.

Whilst Douglas and his friends are striving with all their energies to establish a policy that will put this question of slavery in the Territories out of the political arena, by setling the point that, Congress shall not inter ere, they are railed at in the North as pro avery, and at the South as free-soilers.

The Opposition in each section of the Union em bent on an irrepressible conflict. Each ide invokes Congress to act; one on one side he other on the other.

Now, if the editor of the Journal has re ented of his sins, and is sorry for them; if he hinks there is no occasion for this agitation and that it ought to be stopped, will he use the neans to stop it? What means will he use Will he still rail at the man who says there either necessity nor propriety in any action of Congress on this subject? Will he asser he same thing, and then scream out Squatter overeignty at Douglas?

No national party can occupy either of thes ositions. Conservative men North and South saw this long since, and adopted the doctrin of non-interference by Congress with the sub ect. They adopted the policy from necessity, ot being able to agree on anything else. The ame necessity exists now; and this party in Massachusetts say there is no use in any other olicy now, if it were possible. The Journal dorses their resolution, seemingly unco cious of his self-stultification.

The editor of the Journal is not pleased ith the result of the election on Saturday The brethren were not organized, he says, whilst the Democrats were. We don't think he nows much about his own party, and certain is he knows nothing about the organization f the Democratic party. If he does, he knows there the most aristocratic names of France over than any Democrat knows. In some M. and Mme. Phalen did the honors with wards both parties did their best, but in others here was not much party effort.

As it was, the result will satisfy the good itizens of Louisville. The city government an't now be used for the benefit of party, and will have more time to attend to the interest of presenting it to our readers. It is a portion of the city. We shall, probably, have now a faith- a private letter recently received from one al execution of the law; an end to bullying at whose authority in the matter cannot be questhe polls, and tearing up of poll books. SNUFF DIPPING IN NEW YORK -Of this dis gusting practice, sometimes called snuff digging, the New York Tribune says: "That our readers may form some idea of the enormous prevalence of this habit in their midst, we may state that one tobacconist, having a small tore on Broadway, retails one hundred ounds per week to his 'digging' customer one. His snuffing customers consume bu twenty-five pounds. One firm, keeping a tore on the Bowery, and another down town, makes and sell three barrels (seven hundred ounds) in the same number of days, all o which is consumed by women of New York city. The amount used by each 'digger' varied from one quarter of a pound to a pound per week.

A NEW SEA LIGHT .- Some curious scientific experiments have been made at Nantes by the count de Nettancourt. A box made of tin, and eleven inches long by six wide, was lunged into the river, and immediately the urface of the water to a considerable extent was covered with a brilliant flame, which float ed with the current, and presented differen olors like Bengal fire. The flame lasted about two minutes, and lighted up the surunding objects. The box was plunged still leeper into the water, and the same effect was roduced, but at several yards distance. M le Nettancourt thinks that the light thus pro luced, which he calls "phosphorescent fire, night be useful in naval operations at night, or in saving lives from shipwreck.

As the Charleston Convention approache he excitement increases, and the efforts to make friends for this and that candidate are pressed with vigor. In Paris, apparently, they think it neessary to specify, in speaking of an American, that he is not divorced. M. Gaillardet the brilliant correspondent of the Courrier des

He has made fairy palace of this residence, and one meets here the most aristocratic names of France courtesy which distinguishes the true gentle man and true lady of America."

THE OLD OAKEN BUCKET .- The following reminiscence of Samuel Woodsworth, possesses sufficient interest, we think, to warrant us in duction of the "Old Oaken Bucket," the writer says:

"It was written in the spring or summer o 1817. The family were living, at the time, in Duane street. The poet came home to dinne one very warm day, having walked office, somewhere near the foot of Wall street. Being much heated with the exercise, he poured himself out a glass of water—New York pump water-and drank it at a draught, exclain water—and drank it as a draught, exchange, as he replaced the tumbler on the table, 'That is very refreshing; but how much more refreshing would it be to take a good, long draught, this warm day, from the old oaken bucket I left hanging in my father's well, at home.' Hearing this, the poet's wife, who was always a suggestive hold, said, 'Selim, why have immortalized the name of Woodsw

It would be a matter of regret if the Prince of Wales, satisfied with the homage of the Canadians, should neglect to visit the Republic which now plays so great a part in the world. We do not, of course, anticipate in We had the pleasure yesterday of meetg with J. M. Republic, so none is likely to be so ill under stood by a mere flying tourist. America is not a country of museums and palaces, to be "done" in so many days with a Murray's Handbook. Its interest consists in its people, in the phases of civilization through which they are passing, in the political and commercial activity which they display, in their encial activity which they display, in their encial activity which they display, in their en-ergy and restlessness, their greatness and their weaknesses. Although we cannot ex-pect that a youth in his nineteenth year should be able to appreciate the American Commonwealth, yet we feel sure that a jour-ney through the United States and some asso-ciation, with the people would not be lest ation with the people would not be los

Of a kind and courteous reception the so of Queen Victoria may be very sure. The in-terest of Americans in the descendants of the former ruler of their country is second only to that of Englishmen themselves, and, whateve may have been formerly the case, the feeling is now one of goodwill and sympathy. The Prince of Wales might find both instruction and recreation in a visit to the Atlantic cities whether it be New York in all its ambitiou and span-new splendor or its more quiet rivals There is much to be learnt from a few weeks o such travel—more than a royal personage may ever afterwards have an opportunity of learn-ing. One who is called to such high destinies, and who will have such opportunities of di-recting the tastes of his countrymen, may ad-vantageously study the progress in the arts of life by a people thrown, as it were but yester day, on the shores of a new continent, a pro-gress not less wonderful than their commercia osperity. If the Prince of Wales should fur washington, the courtesy will, we feel sure, be appreciated, and tend to draw closer the ads which unite the two countries.

All which is very true; but the Times has mitted the extraordinary number of silly oad-eaters that the young Prince will be like ly to encounter on this side of the Atlantic both in Canada and the Union.

Too sure, we trace.

The subject is one of general interest:

REPORT OF FIRST LECTURE.

Dr. Fitch labors in a field of science vastly important to farmers, but very poorly understood. As he very justly remarked, last evenying, the devastations by insects are not noticed because so insidiously made; but if our eyes could but be opened to the activity of our little foes, consternation would seize us. Go into our forests and we see every portion of our trees attacked by some insect, trunk, bark, leaves and roots, all having their peculiar depredators. The sweeping away of our forests compels the insects which formerly fed upon them to turn to the orchards, which have replaced the forests. We shall, before many years, see our apple tree branches lopped off, as are the limbs of the common red oak and by the same insect, the "oak pruner."

Foreign insects have been imported in the thousand commodities, and the numberless trees and plants which we import, and these have proved the most pernicious foes to our crops and trees. Our crops and climate favoring their development, there are the limbs of the corps and climate favoring their development the most pernicious foes to our crops and trees. Our crops and climate favoring their development the most pernicious foes to our crops and trees. Our crops and trees. Our crops and climate favoring their development the most pernicious foes to our crops and trees. Our crops and climate favoring their development the labor bestowed. The best variety of the best variety of the best variety of the success of the present meeting as the most a trifle to much dust for comfort on the sport at the Metairie and to contribute to the success of the present meeting as the most argely attended and exciting race meeting and the sund favor two before planting, and in rows eight to cause people to prefer the shade, wherever found; still the day was glorious for out-door forests. The sweakers would grow. Some like it have been in any two before planting, and in rows eight to cause people to prefer the shade, where

have proved the most pernicious foes to our crops and trees. Our crops and climate favor-ing their development, they multiply to a frightful extent, and do far greater damage here than they did in Europe. The bark louse, for instance, on both sides of Lake Michigan, has ruined nearly every orchard.

For years after the settlement of this country, wheat was an absolutely sure crop, but the yield dwindled with successive years, and now, in large districts, its culture is necessa-rily abandoned. Reasons have been urged to account for this; that our soil has deteriorated, and our climate changed, but they do not ex-plain the difficulty. With the best of manuring and tillage, we cannot get the crops our ancestors did with shiftless farming; and even where new woodland, is cleared, and wheat is put into the virgin soil, the crop is infinitesi-mally small. The true cause is to be found in the attacks of insects, and nothing else. Star ing some years ago, with the popular belief that the wheat midge and Hessian fly were the greatest wheat enemies, the learned lecturer had been surprised to discover in every field that he had examined, a host of European insects, new to this country, were flourishing. There were, especially notable, the cholope oscinis and thrips, besides others. In the ol rest days there was no wheat nor any of its The statue of John Adams, intended r the cemetery at Mount Auburn, has reach-l Boston, and will soon be placed in position. congeners; and so when they were first sown, to enemies attacked it; but by degrees, one ofter another finding abundant nutriment in he wheat fields, sought it there, as the trees e statue was shipped in Leghorn on board a vessel, which, after various delays by accident, finally put into Savannah, where it was vere cut away. The wheat midge came from England, and has ravaged our fields for twen condemned. The same vessel brought a num-ber of staues, representing Our Savior and his Apostles, designed for a Roman Catholic y-five years. Cabbage.—Sow some seeds of early kinds, as some of the Early York, Sugarloaf and Winningstadt, as well as some of the early varieties of Cauliflowers. Sow broadcast in a richly manured spot in the open border, where the sun can have free access to the plants.

Radishes.—The best kinds are the Long Salmon and the Red and White Turnip. Sow broadcast in a warm border and give enough seed. Rake it over lightly, and in three or four days the plants will appear. Pull the largest as they grow to a size fit for the table. Sow a fresh bed every two or three weeks to keep up a succession.

Lettuce.—The carliest sown are the best—in fact those self-sown the previous summer are often to be found plentifully in most gardens. To attain perfection they should afterwards be transplanted into an open border, and when of tolerable size, tied up, so as to become white and solid at the heart.

Cresses, mustard and various other salads may be sown as soon as the ground is ready for them.

Tomatots.—No garden should be without these. The earliest plants are the best, and as it is an object to get the fruit ripened as early as possible, it is well to sow some seeds early and pretect the young plants from frost till they can be transplanted. BUSINESS AFFAIRS.

SILKS AT A SACRIFICE .- Guthrie & Brother will sell their entire stock of Fancy Silks at wices forty per cent. less than their value. ersons in want of choice spring silks can now get them at half price.

The Messrs. Guthrie have the best stock of dress goods in the market. In Lace Mantles, arasols, Poplins, Linens and domestics of every description, their purchases are unusually complete. Fourth street.

ldren's Suits for spring wear, at J. M. rmstrong's on Main street, opposite the National hotel, has attracted a very large number of ladies to his establishment during the last Lew days. Mr. A. has an unusually nice stock of clothing for children, youths, boys, and men's wear, all sizes, and of course all whe have any regard to fashion will visit his and Eighth streets; store, if only to see what is to be worn this To recurb and reps

Doors, Sash, Blinds, Boxes, Lumber and SHINGLES .- Messrs. Breeden & Bradley have on hand a large lot of doors, sash, blinds, boxes, &c., at their warerooms, on First street, between Main and the river, and they are prepared to execute all orders for woodwork necpared to execute all orders for woodwork nec-essary for the inside finish of frame or brick houses of every description, as heretofore. They invite special attention to the large stock of well-seasoned pine lumber and shingles at their yard on Walnut street, between East and Floyd. They furnish bills of prices on appli-cation, and solicit orders in their line.

A a time when there is great fear that he stock of dry lumber, sash, doors, blinds, &c., will fall short, owing to the vast amount of improvements in Louisville, it will be inter esting to the public to know that Alexander, Ellis & Co., have enlarged their factory and have now on hand several million of dry lum-ber. Call at their office on Main street, nearly te the Galt House, or at their factory on

TRUNKS .- Among the places worthy of the ttention of the visitors to Louisville at the sent time, is the great trunk manufactory emporium of J. H. McCleary, on the rtheast corner of Fourth and Main streets. His large manufactory enables him to supply trunks, valises, bonnet and hat boxes, carpet bags, bureau trunks, etc., of the very best quality, at unprecedented low prices. All of Mr. McCleary's work is beautiful as well as durable goods. Give him a call.

Look to Your Interests. The people are aware that D. O'Hare, No 427 Main street, is the oldest, largest and most experienced manufacturer of trunks and simiarticles in the city. They should avail themselves of the rare opportunities afforded by Mr. O'Hare. To country and city merchants he offers peculiar advantages in his wholesale department, while in the retail line he cannot be equaled. Whoever wants to travel, whether with a small carpet-bag or a nammoth trunk, need go no further than to the Ninth streets. Great Western Trunk Factory of Mr. O'Hare.

His manufactory is a credit to Louisville, and hould meet with extensive patronage. Hun-dreds of workmen are employed, and thousands of dollars weekly disbursed. As a matter of thome pride, and to subserve economy, pur chasers will consult their best interests in pur chasing of Mr. O'Hare.

BARRY'S TRICOPHEBOUS is the best and cheapest article for dressing, beautifying, leansing, curling, preserving and restoring the hair. Ladies, try it. Sold by all Druggists and Perfumers.
